### Pinching pennies

The price of postage stamps will go up by a penny on May 12. It used to be a real hassle to raise the price of postage - a process that could take up to a year - but a 2006 law allows the the U.S. Postal Service to raise rates with a 45-day notice so long as the increase is within the rate of inflation. (That's 2.9 percent through the end of January.) Expect price hikes every May from here on out, postal officials said.
