

## **A Successful Business that never fails...**

Is the one home business that will work for anyone who will work it. The cost to start is low and the repeat business is always there.

Dry-Tech Systems of Northridge, California has everything you need to put you into the very profitable carpet and upholstery cleaning business.

Dry-Tech has a patented process that dries quickly and is performed with a lightweight, compact machine that you can carry in your car. Not only does it do a superior job over traditional machines, it does it in a fraction of the time.

Men or women of all ages can do this business part or full-time. It's easily learned, not a franchise, no rent to pay and profits are high. We have all the supplies you will ever need. Everyday can be payday. The company has been in business 14 years.

Part-time you can make \$500 to \$1000 per week. You could make it full time and maybe quit your job. I cleaned carpets and upholstery for 16 years. I made up a half-sheet flyer telling what I did and the prices and dropped them by the doorstep, never in the mailbox. I would walk and deliver to 100 houses when I had time. That's all the advertising I ever did, and I was very successful in getting customers.

Is money a problem now? You can get financing with only \$98.00 to start. This company has the lowest prices for equipment that I have found,

There is probably not another business anywhere that is as sure and will always be needed.

Our friendly office staff will be glad to talk with you about it and there is no obligation, of course.
